## Vision

Quality, safety and sustainability are essential to us; we take people's lives to heart. After more than 40 years of design and manufacturing, our passion continues to be the difference. The team at Barry strongly believes in advancing the safety and quality of our products through continuous R&D and testing.

Products and services bearing the Barry Quality & Safety Seal reflect our commitment, unique expertise and innovative solutions in rope and net systems. By keeping safety and quality at the forefront of our business model, Barry has remained an industry-leading producer of high-quality products designed to excel in the harshest environments.

## Mission

Barry designs, manufactures and transforms high quality textile-based products and services aimed at protecting people and assets.

Barry listens to the industry's requirements and finds the most appropriate and cost effective solution. We are your solution finder!

# About Barry

Established in 1978, Barry Cordage Ltd. designs, manufactures and distributes an extensive range of textile-based products and systems across the globe, while affiliate company Barry USA Inc. serves the U.S. market.

**At any given time on the seven continents, hundreds of lives are being protected, preserved and saved by Barry products, systems and services.**

Our products are aimed at protecting people and assets, and we are recognized worldwide for our high-quality products, excellent service and knowledgeable customer support.

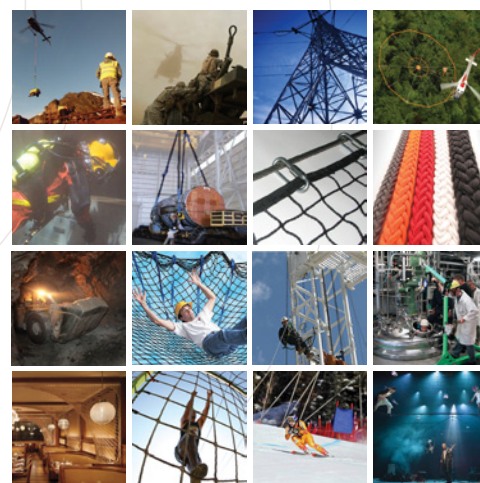

The Barry team is driven by passion for innovation, safety and quality. Our highly-skilled team receives ongoing technical training, and our state-of-the-art production processes, materials and techniques ensure that only products of the highest quality leave our facilities.

## Barry Markets

Companies and government agencies around the world choose Barry products and services for our expertise, quality of workmanship and service. **Our diverse products and systems are used in over 70 countries around the world, in a wide range of industries.**

We specialize in developing custom solutions to complex problems in the following markets:

- |                            |                              |
|----------------------------|------------------------------|
| ■ Aeronautical & Aerospace | ■ Worksite Safety            |
| ■ Defence & Military       | ■ Infrastructure & Transport |
| ■ Utilities & Energy       | ■ Construction               |
| ■ Mining                   | ■ Product Testing / R&D      |
| ■ Oil & Gas                | ■ Commercial Diving          |
| ■ Industrial Manufacturing | ■ Sport Safety               |
| ■ Fall Protection          | ■ Entertainment & Theatrical |
| ■ Geophysical Exploration  | ■ Pharmaceutical             |
| ■ Marine and Off-Shore     | ■ Design and Architecture    |
| ■ Safety & Rescue Response | ■ Public Safety              |

# Lifting and Pulling Loads

Barry is renowned for its lifting and pulling expertise in the aeronautical industry, mainly with helicopter external load products. In addition, we offer several products and solutions for industrial customers such as energy producers, mining companies, manufacturers, theatrical users, and others.

- Helicopter longlines and slings
- Helicopter cargo nets
- Custom made airborne geophysical instrument towing assemblies
- Heavy duty lifting bridles
- Spreader bars and ropes used in energized fields
- Towing ropes
- Winch lines

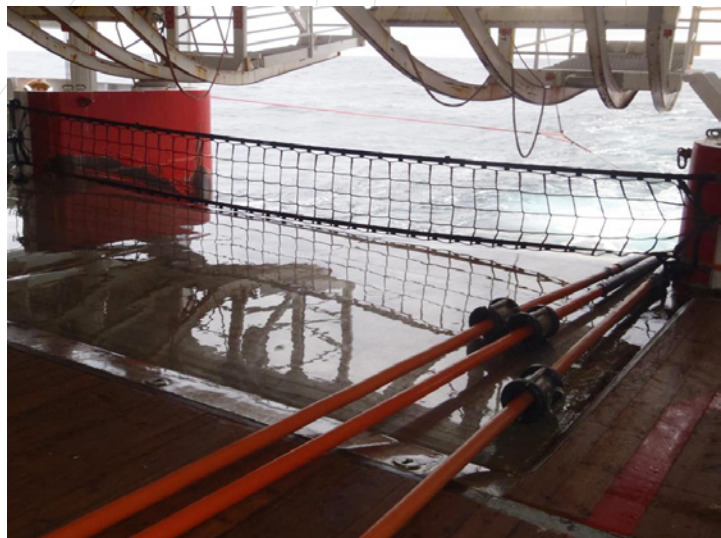

# Decelerating, Containing and Stopping Loads

Barry designs, tests and produces rope and net systems for industrial applications that involve decelerating, containing and stopping loads. Over the decades, we have built solid expertise and conducted countless testing and performance reports aiming to solve complex problems associated with decelerating, containing and stopping loads.

Our unique approach, which uses in-lab or on-site, large to small scale testing, has created a huge advantage in addressing specific solutions for our clients.

- Energy-dissipating rope, net and fence systems
- Shock absorbing slings and energy dampeners
- Weak link assemblies
- Elastic multi-dimensional moorings
- Stabilization netting for concrete and masonry
- Debris nets for environmental protection
- Drift mining safety fencing
- Vertical and horizontal fall protection net systems
- Machine guarding nets and mesh
- Pallet rack safety nets
- Warning lines and access limitation fencing
- Flexible steel cable and webbing ladders
- Professional diving harnesses and lifelines
- Multi-purpose Kevlar straps for firefighters and rescuers
- Water and ice rescue ropes and throw bags
- High angle and confined space rescue evacuation harnesses

# Support, Consulting, and Training

## **Support:**

At Barry Cordage, we take the safety of individuals to heart.

Each year, we publish a number of technical documents and strive to provide the very best instructions and user manuals in the industry.

We strongly believe that the safe use of our products largely rests in the hands of informed users and their understanding of the proper use and limitations of these.

The Barry technical team is available at all times to help find solutions.

## **Consulting Services:**

At Barry we travel the world to provide consulting and help you find the best solutions to complex issues associated with ropes and net systems.

## **Training:**

Barry offers on-site, off-site and on-line training for the maintenance, inspection and use of rope and net products. We offer webinars on the inspection and maintenance of helicopter longlines and cargo nets.

# Fall Protection

Barry offers a wide range of products and equipment for fall prevention and protection. Our goals are to:

- Find and develop **unique and cost-effective solutions**
- Provide the necessary tools and methods to **eliminate risks at the source**

Barry specializes in **manufacturing leading-edge products**, as well as **distributing several industry-leading brands** such as DBI SALA - 3M, to offer you the **best options in fall protection** and rescue equipment. Our team is ready to help you find solutions to your specific requirements, in accordance with your local norms, regulations and budgetary factors.

## Type of systems:

- Vertical / horizontal safety nets
- Warning lines
- Portable guardrails
- Horizontal lifelines and fixed anchors
- Fall protection equipment

We also provide a full range of training and consulting services, including:

- Analysis of your needs
- Assistance with the development of preventive measures
- Analysis and inspection of existing protection systems
- Legal expertise and validation of protection techniques and equipment involved in an incident or accident
